

25th Anniversary FWT a success story

Development of FWT Composites & Rolls GmbH

On September 3rd, 1996, the small doors of FWT Wickeltechnik GmbH opened for the first time.

With a 4m winding machine and the necessary peripheral machines, the first carbon fiber tubes were manufactured with four employees.

Now, 25 years later, not only the name has changed, our product portfolio has also become very extensive.

Today FWT Composites & Rolls GmbH produces with 115 employees approx. 2500 CFRP rollers and drive shafts up to 12 m in length per year

This success story was only possible thanks to the long-standing cooperation with our customers, partners and suppliers.

We would like to say **THANK YOU** for the trust you have placed in us over this long time.

We can promise you that we will continue to place our mission statement **“Innovation and Customer orientation”** at the heart of our daily work and our further development.

Günther Kautz
Managing Director

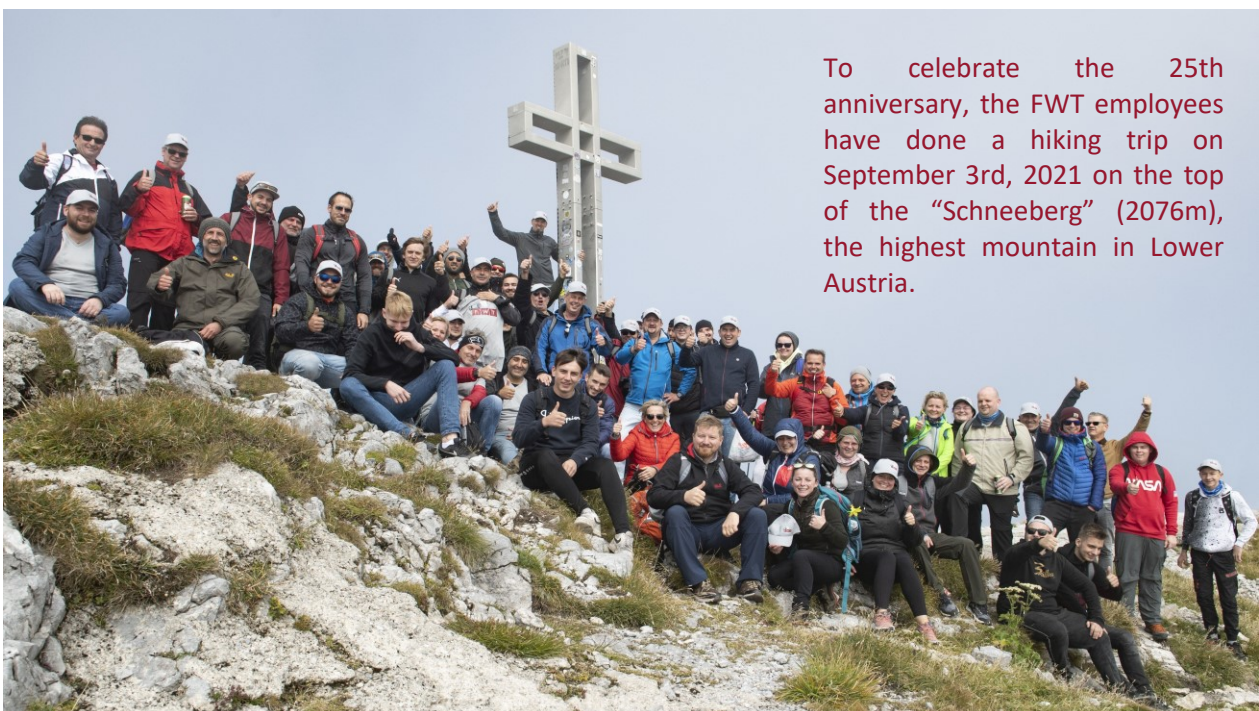

Further Development...

A little overview of the development steps can be seen below.

- 2006 Development of composite coatings
- 2012 Implementation of the rubber coatings
- 2020 Development of our ShieldNite coating types

EXPERIENCE-CONSULTING-CUSTOMER ORIENTATION

To celebrate the 25th anniversary, the FWT employees have done a hiking trip on September 3rd, 2021 on the top of the "Schneeberg" (2076m), the highest mountain in Lower Austria.
